Subject: RE: REVISED: reply requested: EPA technical meeting #4 action items

Tim-

As we discussed on the phone with Erin, I wanted to incorporate your edits while keeping the same basic outline that Cassandra provided. I cross-walked your edits and added those which I felt were reflective of what was discussed in the meeting. I moved some things towards the end and considered them "References."

I think our letter speaks for itself, so reiterating our comments here is not what I was envisioning for this summary. We did do more of that for meeting 1-3 summaries, but those meetings were also much more productive and many more action items came out of them.

Let me know your thoughts and I will plan to follow up with Cassandra tomorrow after your meeting with John and Jane.

My goal is to get 4 meeting summaries that we all can agree on that Cassandra will send out to technical and policy meeting participants alike, so we have one clear record. I know that was your goal since the first technical meeting in November and I'm thankful you've been keeping us on track. We have almost accomplished it!

-Stephanie

Subject: REVISED: reply requested: EPA technical meeting #4 action items
Importance: High

Erin & Stephanie:

Please see the revised version of the meeting #4 summary.

I made revisions to this draft summary consistent with my approach to the previous three draft meeting summaries that the Technical Team endorsed last Monday (save the edit requested by Larry Rabin).

Jane, John, and I plan to discuss this summary next Wednesday, so please make any edits you have directly to this version (in coordinated sequence).

Talk to you Tuesday at our regular Bay Delta Team meeting at 10:00.

Thanks, Tim

Stephanie, Erin and Tim – Attached are the draft meeting notes/action items from Monday's meeting. I'm also attaching a compilation of all the action items from the prior meetings. Please let me know if you have any questions and/or comments on either document.

Thanks, C.
